

# HAVING YOUR TEETH POLISHED AT THE DENTIST

After having my teeth checked, I will have my teeth cleaned and polished

The dentist has a special electric toothbrush to clean my teeth. I will hear it buzz as it's turned on?

It will feel gentle, and I will have a yummy toothpaste flavour I can choose

This instrument squirts water to rinse off the toothpaste after the dentist has finished cleaning my teeth

There is a special straw the dentist who will use this straw to suck up the water and toothpaste from my mouth

I have to remember to open wide for them

my teeth with a small string called floss

After the dentist will use a small brush to paint my back teeth with a yummy flavoured fluoride to keep them strong
